... a bit of theory and revision :)

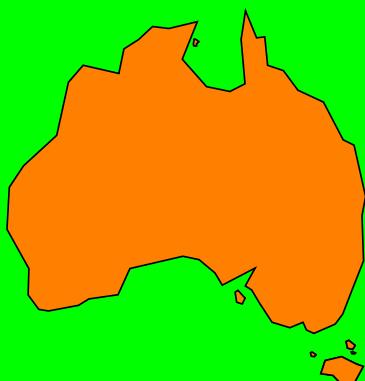

The Commonwealth of Australia is a federation of states. The country consists of 6 states (Western Australia, Queensland, New South Wales, Victoria, Tasmania and South Australia) and 2 territories (the Northern Territory and the Australian Capital Territory).

The Capital Territory is the land around the Federal Capital.

The capital of the country is Canberra.

Each state has its own government and its own capital city. The state capitals are Perth, Brisbane, Sydney, Melbourne, Hobart and Adelaide. These cities are also the country's main ports.

CANBERRA

The capital of the country is Canberra. It is the heart of Australian's Capital Territory and the seat of Federal Government. It is situated in the south-east of the State of New South Wales.

The city was specially planned as a capital. The lay-out of the city was suggested by the architect Griffin. The building of the city was started in 1913.

In 1927 Canberra became the capital of Australia. The population of Canberra is about 367,000 people.

CANBERRA

Canberra is a quiet capital, even in rush hours. There are no industrial plants in the city. All the government buildings are situated in the city.

One of the sights of the city is the Building of the Australian Academy of Sciences. It is one of Canberra's most unusual buildings. It is situated on the territory of the Australian National University which was founded in Canberra in 1946.

SYDNEY

The biggest city of Australia is Sydney. It is the capital of the state of New South Wales and a big industrial centre. About 3 million people live in the city.

Sydney was founded in 1788. It was the first city founded in Australia by British colonists. The discovery of gold in 1851 stimulated its development.

There are some places of interest in Sydney such as Town Hall, Sydney Opera House, the Australian Museum, the University of Sydney and others.

The Australian Museum was founded in 1836. It is the oldest institution of the kind in Australia. It contains a very large botanical garden, a technological exhibit and a library.

The Best Job in the World

The world will soon know who will get the "best job in the world". The position is for a caretaker to live on and look after a tropical island off the coast of Queensland, Australia.

Duties include relaxing on the island, which is part of the Great Barrier Reef, and writing a blog to promote the area. Other responsibilities are to feed the fish, clean the pool and collect the mail.

The job website, islandreefjob.com, tells applicants: "There are over 1,500 species of fish living in the Great Barrier Reef. Don't worry. You won't need to feed them all."

The successful applicant will get a salary of nearly US\$100,000 for the six months. Officials from Queensland's tourism department announced on Tuesday that they were now looking at 50 candidates. Unsurprisingly, over 35,000 people applied for the job.

Answer the questions:

- 1 What is the position they are looking for?
- 2 Where should he/she work?
- 3 What will be the duties of an applicant?
- 4 How much will she/he earn?
- 5 How many people applied for a job?
